Benodigde software https://github.com/ilionx/flasher

- npm i -g @ionic/cli
- git clone git@github.com:ilionx/flasher.git
- https://github.com/ilionx/flasher

Alternatief: https://stackblitz.com/github/ilionx/flasher

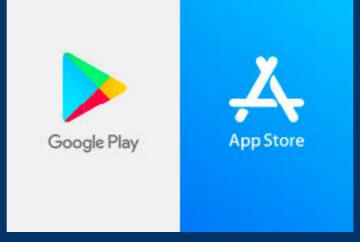

Ionic

Framework voor hybrid apps

lonic onderdelen

Command Line Interface (CLI)

Component library

Onderliggend framework

Capacitor

Installeren en draaien https://github.com/ilionx/flasher

- cd flasher
- npm install
- ionic serve -l

open de code in je favoriete editor

Angular

HTML

```
<ion-button color="alert">
```

TypeScript

@Component({

```
templateUrl: 'home.page.html'
})
export class HomePage {
```

Angular

HTML

```
<ion-button color="alert">
```

```
@Component({
   templateUrl: 'home.page.html'
})
export class HomePage {
   buttonColor = 'alert';
}
```

AngularProperty binding []

```
HTML <ion-button [color]="buttonColor">
```

```
@Component({
   templateUrl: 'home.page.html'
})
export class HomePage {
  buttonColor = 'alert';
}
```

Angular

HTML

```
<ion-button [color]="buttonColor">
```

```
@Component({
   templateUrl: 'home.page.html'
})
export class HomePage {

buttonColor = 'alert';

onClick() {
   console.log('I am clicked!');
}
```

Angular Event binding ()

HTML

```
@Component({
   templateUrl: 'home.page.html'
})
export class HomePage {
   buttonColor = 'alert';
   onClick() {
      console.log('I am clicked!');
   }
}
```

Startpunt voor de volgende opdracht

https://github.com/ilionx/flasher

 git checkout startpunt-angular of

stackblitz.com/github/ilionx/flasher/tree/startpunt-angular
